REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or adequately suggest the instantly claimed reactor apparatus comprising a regenerator catalyst circulation control valve means, for controlling the passage of catalyst from the regenerated catalyst outlet to the lift gas riser, and a catalyst circulation control valve means, for controlling the passage of catalyst from the disengaging vessel to the riser reactor; wherein the regenerator catalyst circulation control valve means is specifically manipulated as a function of the riser reactor temperature; and wherein the catalyst circulation control valve means is specifically manipulated as a function of the difference in pressure between an upper portion of the riser reactor and a lower portion of the riser reactor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
